Reimagining Clinical Communications

ONPAGE

Pagers impede efficient workflow by adding 33 extra minutes in communication time for each patient.

Pagers cause an annual loss of approximately $728,000 per US hospital
- Study by the Ponemon Institute

Pagers are on their way out.

1921: The first-pager like system was used by the Detroit Police Department
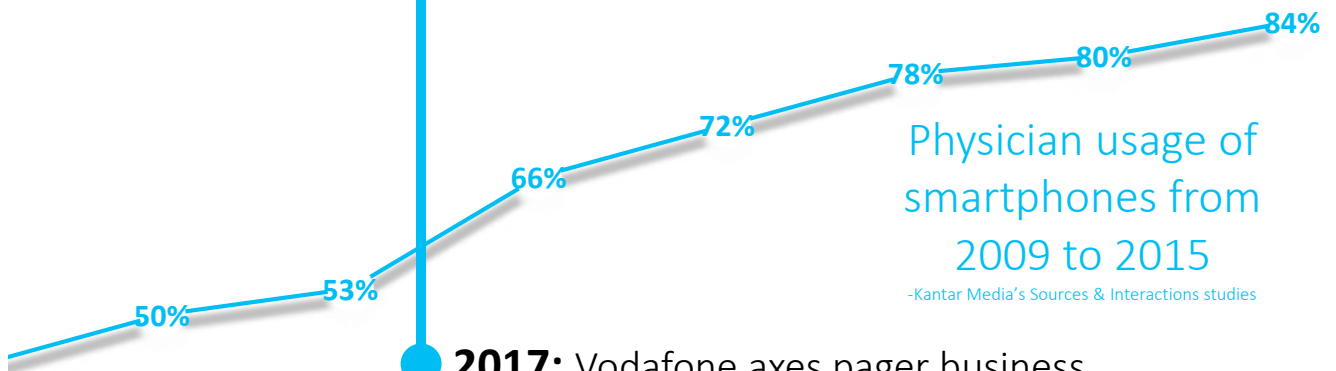

1994: There were 61 million pagers in use

1995: Motorola introduced the world's first two-way page

2001: Motorola and Glenayre begin to exit the paging space

2006: Frost & Sullivan stop tracking the pager market citing it's irrelevance

50% 53% 66% 72% 78% 80% 84%

Physician usage of smartphones from 2009 to 2015
-Kantar Media's Sources & Interactions studies

2017: Vodafone axes pager business

ONPAGE
Clinical Communications Platform

OnPage is an Incident Alert and Management System used by healthcare personnel, to ensure important notifications get to the right provider at the right time. Every time! Hundreds of healthcare facilities have selected OnPage as an alternative to antiquated and unsecure pagers.

- HIPAA complaint secure two-way messaging
- Send messages and alerts in seconds
- Individual and group escalation
- Sync contacts to your device
- Web based portal access
- Audit trails with read/delivery confirmation.
- Remote wipe capability
- Multiple message redundancy and failover options
- Fault proof scheduler
- Real time reporting

Slash response times to incidents with the fastest alerting out there. Persistent alerting will push to your phone for up to 8 hours.

Intuitive scheduler. Set up a schedule, create groups and escalation policies to ensure alerts get to the right people.

Escalate alerts if the initial individual or group alerted is not available. Multiple redundancies and failover options available
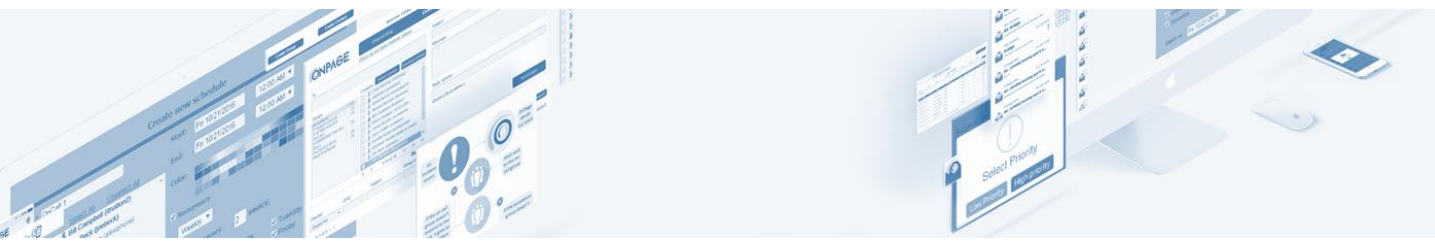

OnPage is Perfect For…

Doctors and Small Practices

OnPage is a HIPAA compliant messaging and alerting service. It is the perfect alternative to antiquated pagers. Communicate in a secure environment and include images and voice attachments to your text messages. Reply/forward messages to colleagues.

Hospitals

Drive up revenue through efficiency and getting rid of outdated technology. OnPage provides an enterprise solution that encompasses, on-call scheduling, pager functionality and internal communications for healthcare personnel.

Healthcare IT

Healthcare institutions cannot afford downtime. OnPage equips IT personnel with faster incident resolutions through critical, persistent alerting. OnPage's escalation policy and scheduler make it easy to organize shifts.

We understand that speed matters. OnPage HIPAA complaint alerting arrives up to five times faster than pagers.

Schedule a Demo
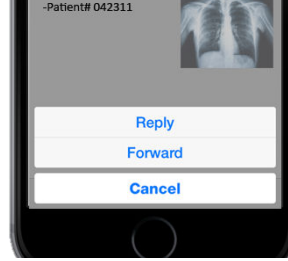

Streamline clinical communications

- Support two way messaging that enables replies and message forwarding.
- Utilize predefined replies for speedy messaging.
- Send messages to groups to improve collaboration.

Secure Messaging with Attachments

Securely attach:
- Images in various formats
- Voice notes to elaborate on medical consults
- Documents in .PDF or .DOCX format.
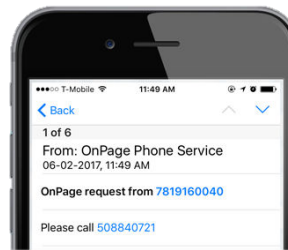

Dedicated Phone lines

- Personalize your phone greeting.
- Connect patients with their healthcare provider through Real-time Call Routing.
- Create phone trees to allow easy access to internal departments and sister facilities.
