

# Case Study:

## How OnPage Provides Reliable Communications for SJH Cardiology Associates

## OnPage provides dependable HIPAA compliant communication

SJH Cardiology Associates selected OnPage for dependable HIPAA-compliant communication and encrypted messaging among their MDs and staff. OnPage provides SJH with a reliable and secure communication platform that protects patient information and automatically notifies the sender when critical messages are delivered and read.

“OnPage is the perfect tool for medical personnel wishing to send secure and dependable messages via cell phones. So far, both physicians and staff are thrilled with the reliability, ease, and ability to keep track of messages for any given length of time. The staff at OnPage has been both courteous and helpful and the cost is fair. 10 out of 10.” – Barbara D. Capriotti, Office Manager at SJH

Located in Central New York, SJH Cardiology Associates specializes in the detection, diagnosis, and treatment of cardiovascular disease. SJH Cardiology Associates provides the highest quality of care to their patient population, implementing the most advanced methods of early detection, clinical management, prevention, education, and rehabilitation of the cardiovascular disease process. Now, with OnPage, they make use of modern technology that ensures that their MDs and staff are always informed and immediately reachable in emergency situations.

## About OnPage

OnPage's award-winning incident alert management system for IT, MSP and healthcare professionals provides the industry's only ALERT-UNTIL-READ notification capabilities, ensuring that critical messages are never missed. OnPage enables organizations to get the most out of their digital investments, so that sensors, monitoring systems, and people have a reliable way to escalate urgent communications to the right person immediately.

OnPage's escalation, redundancy, and scheduling features make the system infinitely more reliable and secure than emails, text messages and phone calls. OnPage shrinks resolution time by automating the notification process, reducing human errors and prioritizing critical messages to ensure fast response times.

Whether to minimize IT infrastructure downtime, or to reduce the response time of healthcare providers in life-and-death situations, organizations trust OnPage for all their secure, HIPAA-compliant, critical notification needs.
